

5 Ways to Help Your Child Become a Better Reader and Love Books!

1. Read books with rhyming words, especially to younger children to increase their phonemic awareness, which is the ability to notice individual sounds in words.
2. Play spelling games (Boggle, Spill and Spell, Junior Scrabble) to increase your child's phonetic skills, which is matching letters to their sounds.
3. Read and reread familiar books to increase fluency, which is reading accurately with expression.
4. Be sure to read aloud to your child! Children love being read to and reading aloud will help increase children's vocabulary.
5. Ask your child who, what, when, why questions as you are reading together to strengthen their comprehension. Have your child retell the story with a beginning, middle, and ending.

**Share your love and
enjoyment of Reading
with your child!**
